

PURPOSE: To unblock non-harmful sites from the “MSMS Students” wi-fi network

INTRODUCED BY: Roman Luckett

BE IT RESOLVED BY THE MISSISSIPPI SCHOOL FOR MATHEMATICS AND SCIENCE SENATE:

SECTION ONE (REASONING):

Students at MSMS are aware of the mobile device policy they are expected to follow during class. Therefore, it is redundant that certain sites and apps are banned on the wi-fi network in Hooper. The fact that such sites and apps are not blocked on the wi-fi network in the dorms insinuates that they are blocked in Hooper to maintain academic integrity.

Many students have free class periods that they spend in Hooper. It is especially unfair to students who are not in class to be restricted from using entertainment apps and informational sites. While it is certainly important to prevent harmful sites on the school network, some blocked sites present no harm to instruction in Hooper or student safety.

SECTION TWO (~~APPENDIX~~ PROPOSED ACTION):

Below is a preliminary list of sites & apps to be unrestricted on the “MSMS Students” and “msmsnet” wi-fi network:

Clash Royale

Quora

Brawl Stars

Arknights
