

PURPOSE: To add a section to the Student Handbook that provides accurate descriptions of the Academic and Behavioral programs set in place for students..

INTRODUCED BY: Marqueveon Quinn

BE IT RESOLVED BY THE MISSISSIPPI SCHOOL FOR MATHEMATICS AND SCIENCE

SECTION ONE (DEFINITIONS):

Academic Watch: The process of directly observing a student's academic progress to determine whether aid is needed.

Academic Probation: The process of restricting certain activities and setting required aids as well as working alongside the student to better help improve their academic progress.

Behavioral Intervention Plan: A plan created to help students with behavioral issues or multiple infractions.

SECTION TWO (REASONING):

A student's academic and behavioral progress is an important part of the MSMS experience and at some point, many students will not be performing their best. However, there are safety nets set in place to help those in need such as Academic Watch, Academic Probation and Behavioral Intervention programs. The problem is that the students do not really understand what each plan is. This bill aims to create a section that gives a brief description of each plan.

SECTION THREE (SPECIFIC CHANGE):

On page 35 of the Student Handbook (PDF page 40) under the section "ACADEMIC PROGRAM" the following would be added under the second paragraph:

Depending on a student's behavior and/or academic performance at the end of but not restricted to each quarter they may be subject to one or more of the following plans. Academic Watch is a process in which a student is closely watched by the administration in case of academic issues, the student may be subject to required aid depending on the situation. Academic Probation is a program in which Administration works alongside the student aiding in the process, students are most likely on a restricted plan to ensure grades improve. Lastly, the Behavioral Intervention Plan is a set of procedures and restrictions set in place to correct the behavior of a student.
