

PURPOSE: To allow students to sign into class when a teacher is absent through email.

INTRODUCED BY: Sydney Beane

BE IT RESOLVED BY THE MISSISSIPPI SCHOOL FOR MATHEMATICS AND SCIENCE

SECTION ONE (REASONING):

When teachers are absent from school students usually must go to the office and physically sign in. This can be inconvenient for students who are not immediately in the Hooper building. This can especially be inconvenient for a morning class or classes that are surrounded by off-block. After speaking with staff and students this would not be a difficult protocol to implement. Some students already ignore the protocol and still send staff emails instead of signing in. Many students also often forget, causing staff to have to email them separately. An efficient way to implement this is for the teacher to begin a thread, when they know that they will miss class, here the students can reply for attendance. The teacher could either cc' Mrs. Nisa/ whoever else might be in attendance for the day or send the results to her before the end of the class period.

SECTION TWO (APENDIX):

Response 1: "If I know my 8 am class is cancelled I might stay up a little later to get work done. So, if I could schedule send my email the night before it would ensure I could get adequate sleep that night by not having to wake up to just walk to hooper and then come back to the dorms."- Anonymous Student

Response 2: "Signing into classes online makes it much easier for all parties, as it makes it more efficient for students to use their time for other matters (ie. finishing their own work at a library, being able to grab something to eat, etc.) The idea of having to physically walk to sign in for a class takes away from our flexibility as MSMS students, granted that we are always on the go! All in all, emails can become very convoluted since students can forget to email, hit "reply all", don't email in the correct email chain, or for the admin's side... having 20+ emails to go through all at once. If there was a different system for students to use strictly for attendance purposes when teachers aren't around, that would be best. I would suggest a system, but I am unknown to any at the time."- Anonymous Student
