

PURPOSE: Encourage Residential Staff to contact individual students directly through a phone call instead of through the intercom and use the intercom for more general announcements.

INTRODUCED BY: Sydney Beane

BE IT RESOLVED BY THE MISSISSIPPI SCHOOL FOR MATHEMATICS AND SCIENCE SENATE:

SECTION ONE (REASONING):

Many students fail to hear their name called over the intercom for many reasons such as, wearing headphones, sleeping, being in the bathroom, etc. When it comes to time sensitive calls, missing your name over the intercom can cause avoidable setbacks.

When trying to get in contact with students who are not in the dorms at the time, it decreases the steps a residence staff must take when looking for a specific student, as they are skipping calling the student over the intercom.

This will minimize the number of announcements made over the intercom, which will cause less of a disturbance for all residents and a sense of privacy for the student being called on.

~~As the 5th west intercom in Goen has been broken since the beginning of the school year t~~This solution could be great to work around damages to the intercoms throughout the year that may take time to repair.
