

PURPOSE: To introduce water coolers within outdoor/active sports

INTRODUCED BY: Avary Bodmer

**BE IT RESOLVED BY THE MISSISSIPPI SCHOOL FOR MATHEMATICS
AND SCIENCE**

SECTION ONE (REASONING):

After settling into MSMS for over a semester of time it has come to my attention just how much dehydration is an issue. I have not quoted anyone, but I have discussed it with multiple peers and staff. After discussing with my other peers that are included in the sports of MSMS it would be the best idea to add water coolers to outdoor sports. Every other school with outdoor sports has some sort of water cooler to some extent, so it really does not make sense as to why MSMS has not invested in a couple with there being multiple students with issues when playing/practicing. Accessibility makes the coaches/captains hold players accountable to staying hydrated and not hurting themselves so that the players can continue playing at their best. Playing sports can be distracting for your health when you continue to focus on the game at hand, having access to water on hand will serve as a good reminder to students to stay hydrated.

SECTION TWO (Responsibilities):

The question of who is in charge of these water coolers should be brought up; Managers, Captains, and water boys. If there are no managers at the time **then** responsibility should fall on the captains during a practice setting. On the day of the competition the “water boys” should be in charge at that time if managers should/would help instruct on how the best way to transport/ pass the water would be greatly appreciated.

Where would the water come from?

The best place pertaining to this question would most probably be the hose in the back of each res life. If that does not suffice, I believe there is a way to get water from the water fountain. In the past asking for ice from the ice maker in Goen would help with the exhaustion of students, but recently the ice machine has become off limits.

Where to keep the water coolers?

The best proposed option for placement **is** the supply closets holding certain supplies for sports teams.

SECTION FOUR (APPENDIX):

Students of MSMS have said and shown that it is a hard venture to get wellness, with this a new idea becomes available can implement “Water Boys”. We would have certain volunteers be involved in whatever sport competing, meaning they should be able to get however many wellness hours that they are with the team. This is a new idea I was recommended by someone; I think it is a great idea for helping solve the issue of wellness not being completed.
