

PURPOSE: To allow students to have an accurate grasp of their grades and feedback before final grades are submitted by having ~~assignment grades~~ **graded materials** back by 2 weeks after their due date.

INTRODUCED BY: Megan Colley

BE IT RESOLVED BY THE MISSISSIPPI SCHOOL FOR MATHEMATICS AND SCIENCE SENATE:

SECTION ONE (REASONING):

Many students struggle with getting feedback and improving in certain classes. Something that exacerbates this struggle is students having to submit assignments before their previous one is graded. (Ex: Having an essay due before you get feedback for your last essay). This does not allow students to correct ongoing mistakes and improve their grades.

Many colleges and universities recommend their faculty to provide students with a framework describing when students should expect their assignments to be graded. (UCF includes it in a “best practices” section; <https://cdl.ucf.edu/setting-expectations-for-instructor-response-time-and-feedback/>)

Instructors are advised to take no more than two weeks to grade assignments after their due dates. This will give students ample time to improve their work before final grades are submitted. The goal of this resolution is not to put teachers on a deadline, as it is understood that some assignments take longer to grade.

SECTION TWO (APPENDIX):

Response 1 (Anonymous):

“In many of my classes, teachers put grades in at the last minute, and I never know what my grade is until the quarter is over.”

Response 2 (Anonymous):

“One time I had an essay due in October and didn’t get feedback on it until December. Between then we had other essays due, and I didn’t have any feedback so I couldn’t improve.”
