

PURPOSE: To allow Residential halls' work service to be rotated every semester and to allow academic buildings' work service to be rotated every 9 weeks.

INTRODUCED BY: Senator Malhotra

BE IT RESOLVED BY THE MISSISSIPPI SCHOOL FOR MATHEMATICS AND SCIENCE:

SECTION ONE (REASONING):

Students are tasked to do work service in different settings and one of those settings is the residential halls*. Students are given a certain task that goes through the entire year and some students are lucky with their tasks while others are not as lucky. This causes students to burn out due to the severity of their work service which can hinder their ability to do other activities.

The reason for the rotation being every semester for the residential halls is to allow the work service supervisors to train students, and students are then able to reciprocate their duties to the best of their abilities. The reason for the rotation being every 9 weeks is because that is the norm and it is conducted in a much smaller environment than that of the residential halls and takes less time for students to be acquainted with their roles in the academic buildings.

SECTION TWO (RESPONSES): I asked students what their opinions are when it comes to the rotation of work service and do you or not think that we should have a rotation.

Response 1 (Anonymous):

"I'd say that should need to be changed. For example, mopping a floor takes a good bit but cleaning the lobbies doesn't take long at all."

Response 2 (Anonymous):

"Well, I think that the semester system for work service is a fair system for students. Arguably, some work services can be more physically demanding and time-consuming compared to others, such as hooper lobby and bathrooms. The semester rotation system prevents certain students from being stuck in those work services. I can say that cleaning the lobby was more difficult compared to cleaning the reading room, but I was glad that I didn't have to do the lobby for the entire year. Again, the rotation prevents students from being stuck in a comparatively difficult work service."

Response 3 (Anonymous):

"No"

SECTION THREE (Proposed Action):

To have a set rotation for the different work service areas, created by their work service supervisors. This will allow supervisors to accommodate for any discrepancies in the work service roster if that problem were to arise. It will also allow students the ability to change their work service and have some change in what they do.

*Students assigned a teacher or staff Supervisor for a specific service (i.e. office staff, teacher's aide, or students requested by a supervisor for their service) will not be on any type of rotation and will stay with that supervisor for the entire year unless a problem arises where a supervisor change is necessary.
