

PURPOSE: To implement a quarterly student reporting system

INTRODUCED BY: Elle Valentine

BE IT RESOLVED BY THE MISSISSIPPI SCHOOL FOR MATHEMATICS AND SCIENCE SENATE:

SECTION ONE (REASONING):

The purpose of this bill is to create a consistent way for students to provide meaningful feedback on their teachers and classroom experiences. Quarterly after the end of each term and at the start of a new term evaluations would allow teachers to identify areas where their teaching methods could be improved and adapt their approaches based on student feedback. Several students have expressed concerns that their grades may suffer due to a lack of understanding caused by the teacher's instructional methods.

SECTION TWO (PROPOSED ACTION):

Every nine weeks there will be an anonymous form sent out by admin requesting information on how well the teacher explains new information, answers questions, assigns helpful assignments, communicates effectively, and engages with the class. The students will fill it out and turn it in online. This form will be open for two weeks. These forms will be reviewed by the teacher and administration. ~~If multiple forms are saying the same thing, then the teacher will be asked to change the way they teach. This will be followed up with a form sent out to that teacher's students that will also be anonymous. If the teacher still isn't doing a good job administration will take over~~

SECTION THREE (APPENDIX):

"I think having feedback more consistently and standardized is a good thing. Having feedback around the midpoint is good, and maybe you can time it to be right after the end of the quarter." - Dr. Hester

"I would say choose the questions wisely, like don't make it so long that it becomes like this enormous task. Fewer questions, but more quality questions." - Dr. Palagi

"I do think I can agree to opening that window a little bit longer. I think that is a great suggestion." - Dr. Easterling
